SPARING OF SOURCE

COLLECTORIC PRELIMINARY SPARING OF CONTENT

The Aero Aircraft Plant in Prague-Vysoecany now employs about 2,000 workers and is being constantly enlarged. At the present time the plant produces only B-52 model light planes at a rate of two planes per day. Many of these are in storage at Kbely Airfield. About a month ago plant draftsmen started copying the blueprints of a late model Soviet jet plane. Once before the plant was entrusted with the production of Soviet aircraft, but when blueprints and plans were already far production, the work was halted and the blueprints destroyed.
